# **Committee on Discipline**

## **Reported Cases**

There were 812 total complaints brought to the Committee on Discipline's attention in academic year 2020-2021. The Committee on Discipline (COD), chaired by Professor Andrew Whittle, resolved complaints by adjudicating cases of alleged misconduct. Of those 812 complaints, 809 (99%) were complaints alleging individual student misconduct and 3 (1%) were complaints alleging student organization misconduct.

#### Case Trend

The case numbers for this past year reflect the impact of the Covid-19 pandemic, altered campus access, and Covid-19 policies. 78% (632) of the cases pertained to violations of Covid-19 polices. Reports of academic misconduct increased by 132%. Personal misconduct (excluding Covid-19 policies) decreased by 76%.

The following stacked bar chart shows that the number of cases reported to the COD over a seven-year period.

The tables below summarize alleged policy violations from 2020-2021 compared to previous years. There is often more than one alleged policy violation per complaint, so there are more alleged policy violations than total complaints.

**Table 1** shows the types of alleged policy violations for individual student misconduct:

### **Case Resolutions**

The COD utilizes resolution methods as described in the <u>Rules of the Committee on Discipline</u>.

Given the unique risk factors associated with students returning to campus and the need to take immediate action to address noncompliance with MIT's Covid-19 policies, the COD delegated authority to the Office of Student Conduct & Community Standards ("OSCCS") to address violations of MIT's Covid-19 student and Institute-wide policies on an <u>expedited basis</u>.

**Table 3** shows the COD's resolution methods in 2020-2021 compared to previous academic years:

<sup>\*</sup> Covid-19 Dismissal refers to the following. During the 2020 fall while data tracking for testing compliance was still in early development, 55 students were referred to our office who were found to

be in compliance upon further investigation, prior to notifying the student (hence not a finding of not responsible). Further, OSCCS received 18 reports of without a specific respondent and therefore was unable to pursue individual accountability, but still engaged in educational follow up with appropriate communities. Additionally, we received some reports that were not policy violations. In all cases where appropriate, educational interventions were utilized.

#### Case Outcomes

COD strives to meet its educational philosophy of student accountability through intentional educational sanctions (e.g., substance use education, mentoring programs, projects, reflections, workshops, etc.). Through these structured sanctions, students learn about various interpersonal skills and are able to reflect on their own personal development. A small number of cases (0.3% in 2020-2021) require a student to be separated from the Institute, either temporarily or permanently. 99.7% of cases are resolved without suspension or expulsion.

Table 4 shows sanctions assigned during the 2020-2021 academic year, compared with the two previous years:

<sup>\*\*</sup> Dismissal is not the same as a finding of not responsible. It means that the situation did not rise to the level of a possible policy violation, but still may have involved educational follow up.

<sup>\*\*\*</sup> Most GSAP cases were referred directly to AODS and only a few are referred to OSCCS because at the onset it was unclear if GSAP applied or not in the case.

Note: It is common for the COD to assign more than one sanction in a case, so there are more sanctions than cases. Sanctions exclude all cases in which the respondent was found not responsible, the case was dismissed or the case is still pending.
